DESCRIPTORS: Ocean currents, Turbulence, Heat
transfer, Earth, Climate.

The possibility of changing the climate of the earth by
the artificial redistribution of insolation heat among
the different areas of the globe is considered. Two
phenomena associated with coastal currents are ana-
lyzed: (1) the process of turbulent exchange in the
coastal zone, and (2) the appearance of countercurrents
near the coasts of straits.

compounds, Chlorides, Smear test, *Diffusion.

Diffusion measurements made with an interferometric
microelectrophoresis apparatus are described. The
experimental results obtained with potassium chloride
and sucrose are consistent within 1.5 per cent with the
data reported in the literature. A simple evaluation
method of the graphs is proposed and a comparison is
made with other methods. (Author)

The authors show that clinically and experimentally
the variations observed of the neuromuscular excita-
tion which go in parallel with the transmembranic ion
exchanges, are explainable only on the base of varia-
tion of regulations of the cell metabolism. These
facts lead them to consider the cellular functioning as
